DIGITAL HEALTH INNOVATION: DEFINE MEASURE IMPACT

COCIR

STRATEGIC PARTNER OF THE EUROPEAN SUMMIT ON DIGITAL INNOVATION FOR ACTIVE AND HEALTHY AGEING

This year's COCIR eHealth Summit is under the umbrella of the **EUROPEAN COMMISSION'S EUROPEAN SUMMIT ON DIGITAL INNOVATION FOR ACTIVE AND HEALTHY AGEING** (5-8 Dec 2016, Brussels).

The event builds on the outcomes of previous COCIR eHealth Summits looking at Big Data and the role of eHealth in delivering Integrated Care.

Industry needs to demonstrate the value of Digital Health Innovation in delivering Integrated Care. Information on the value of solutions will define innovative business models, broadening and accelerating eHealth uptake.

OBJECTIVES OF THE COCIR eHEALTH SUMMIT

The COCIR Summit will offer a great chance to reflect on how we can build a compelling value proposition for digital health, at the crossroads of patient-centric and Integrated Care.

The event will be organised around three thematic streams to cover some of the most relevant aspects of Digital Health Innovation namely:

- **Defining Integrated Care workflows** to deliver person-centred care,
- **Leveraging data and intelligence** to improve population health management and
- **Building strong evidence** to achieve the greatest impact.

The Summit will also aim to contribute to the ongoing wider debate on the digital transformation of health and care and support the development of a **shared vision for Europe's ageing society**.

- **Join** the multi-stakeholder dialogue on the value of Digital Health Innovation for Europe.
- **Discover** how Digital Health improves care quality, enhances population health and secures health system sustainability.
- **Learn** how to measure and communicate on the value of eHealth solutions.
- **See** how many European health systems are scaling up innovation within a truly integrated care ecosystem.
